20-23 March 2018 Moscow, Expocentre Fairgrounds, pavilion 3 / www.interfabric.ru
RESULTS OF THE EXHIBITION

Within the framework of the INTERFABRIC-2017.Autumn,

the Textile Expert Forum was organized

-professional platform for communication, on which each company had got an extra opportunity to show the best samples of its new collection and get acquainted with the autumn-winter 2018/19 season trends.

The professional INTERFABRIC Award – 2017 ceremony has become the result of the work of the Forum.

Authoritative industry experts and representatives of the business community, authorities, well-known analysts and representatives of the business sector were the speakers of the business program events: Anna Lebsak-Kleimans, Inga Mikaelyan, Irina Borodavko, Elena Rehak, Svetlana Romanova, Maria Kulikova, Konstantin Yakunin, Natalia Vstovskaya and others.

Next companies were the partners of the business program sections: Fashion Consulting Group, Fashion Factory School, RBC, PRIME factoring group, Express RMS, Just Logistics agency, Romir group etc.
RESULTS OF THE EXHIBITION

The business program of the exhibition was successfully completed with a series of workshops and holding of a trade and purchasing session (TPS) with the participation of well-known major retail chains:

- Decathlon
- Glance
- SELA
- Finn Flare
- O'stin
- Baon
- Forward
- Modis
- IKEA
- Victoria Andriyanova House
- METRO
- and 50 Russian manufacturers of various types of light industry products
REVIEWS OF PARTICIPANTS

ALEXANDRA KALOSHINA, the founder of the Solstudio Textile Design, ‘Radical Chic’ brand of accessories

"Samples of the best seasonal fabrics of participating companies concentrated in one place gave an opportunity to look at the producers' view on the seasonal preferences of consumers. In addition, the trend zone of textile design was very popular. Instead of the stated two trend-tours per day, seminars were organized and held almost every hour for the most diverse audience."

ANNA LEBSAK-KLEIMANS, General Director of Fashion Consulting Group.

"The business program of the exhibition provided an opportunity not only to get acquainted with the trends that form the textile industry, but also to establish personal contacts with specialists and business representatives, to find useful contacts for practical daily work. In addition, the professional team of the organizers of the exhibition created a very attractive atmosphere within the business program, balancing the business and personal communication of all participants of the program."

Lyudmila NORSOYAN, Fashion factory School.

"Since the first season INTERFABRIC has attracted the attention of all professionals of the fashion industry of the country and my personal. The request of the organizers for the creation of the world-class exhibition aroused a keen interest of potential participants - producers of modern textiles of classical and innovative directions, interested in productive information, in working contacts of visitors - developers and manufacturers of on-line apparel and designer brands in search of unique textile offers and mutually beneficial conditions cooperation.

INTERFABRIC and its organizers have set a high level of the exhibition, and I sincerely wish everyone an evolution and a revolution in the domestic fashion industry."
REVIEWS OF PARTICIPANTS

DMITRY KOLYASOV
head of the profile department of the Industrial Development Fund

"The participants of the exhibition and its Business Program showed considerable interest in combining financial and non-financial support tools for the industry, first of all, through the state information system of industry. As the discussions in the forum showed, access to more than five hundred measures of support from development institutions is becoming more and more important for producers, which contributes to expanding the capacity of enterprises to attract financial resources for investment projects."

ANDREI CHURAEV
Director of Bosco MANUFACTURE

"As the lively discussions at this forum have shown, the world's light industry is developing in the main areas: the use of digital technologies in the design and management of production; the mechanization of manual labor and the development of new materials with special properties and increased consumer properties. The business program of the exhibition allowed to determine the ways of development of intra-industry interaction and, figuratively speaking, the vector of efforts. The industry participants need to exchange experience and popularize successful projects implemented: this was fully confirmed during the exhibition and all its events."

NATALIA VSTOVSKAYA
General Director, ‘Friendly World’ LLC

"The program of the exhibition turned out to be complex, with a high degree of concentration on specific topics. For example, at a session on state support, the organizers managed to present a multidimensional picture of the process, as well as programs, technologies and contacts for continuing production and investment activities."
